

THE LOOK, ON ONE PAGE

A field guide, not a slide deck.

Built for the owner-operators and project leaders across the Study Groups membership. Industrial signage type, a warm serif for the thinking, and a sign-like readout for the numbers. One token file drives every document, so it re-skins to your brand or to a host's in minutes.

PALETTE

Study Groups royal blue carries the structure and the masthead. Their brick red is the single hot accent, rationed to one mark per page, never decoration.

TYPE

DISPLAY / Barlow SC

Hours back per PM

BODY / Spectral

The thinking, in a serif you trust.

DATA / Space Mono

VALUE ÷ WEEKS = 75

Signage grotesque for headers, warm serif for prose, mono for anything numeric. A pairing tuned to the trade, not a default.

SIGNATURE ELEMENT · THE PRIORITY READOUT

A compact, sign-like readout. It shows impact over time-to-value and lands a single look-here number. A flashlight, not a verdict: it tells the room where to look first, then hands the decision back to them.

THE SEQUENCE DEVICE

Numbered only because the order is real: you cannot rank what you have not framed.

- 01 FRAME**
Bound the idea as a safe-to-fail pilot.
- 02 PRESSURE-TEST**
Attack a depersonalized case, refine it.
- 03 ORDER**
Read value over duration. Decide.

THE PILOT CARD

RFI and submittal drafting

SAFE-TO-FAIL PILOT · 1 PROJECT · 30 DAYS

BOUNDARY

One project, one PM. The PM edits and sends every item.

INTENT

Give a PM hours back each week on routine correspondence.

Spend the boldness in one place. The readout is the thing they remember. Everything around it stays quiet and disciplined.
